DERMATOLOGY AND VENEREOLOGY

Information Leaflet for Patients

ACNE: HOW TO TREAT IT

The aim of this leaflet

This leaflet is designed to help you understand more about acne vulgaris and in particular it tells you about different types of treatments for acne.

EUROPEAN ACADEMY OF
DERMATOLOGY AND VENEREOLOGY

Information Leaflet for Patients

A detailed illustration of a skin cross-section. The top layer shows the epidermis with its characteristic wavy surface. Below it is the dermis, which is a lighter pink color. Several overlapping red circles of varying sizes are drawn over the skin, highlighting specific areas of interest, likely related to the production and evolution of acne.

ACNE: PRODUCTION, EVOLUTION AND DIAGNOSIS

The aim of this leaflet

This leaflet is designed to help you understand more about acne vulgaris: it tells you what this condition is, how it develops, what it looks like, and what factors influence it.

DERMATOLOGY AND VENEREOLOGY

Information Leaflet for Patients

CONTACT DERMATITIS

The aim of this leaflet

This leaflet is designed to help you understand more about contact dermatitis. It tells you what this condition is, how to recognize it, and what can be done for treatment.

EUROPEAN ACADEMY OF
DERMATOLOGY AND VENEREOLOGY

Information Leaflet for Patients (and for General Practitioners)

DERMATOPATHOLOGY: SKIN UNDER THE MICROSCOPE

The aim of this leaflet

This leaflet is designed to help you understand more about dermatopathology. It provides information about how a diagnosis is made: by the laboratory testing of small amounts of skin tissue ("samples") removed from your body. This leaflet also explains what happens to your results after testing has been performed.
